Hello Matt,

I am transmitting this staff report evaluation regarding DEQ source control efforts to you as requested by Cami Grandinetti during our meeting on Wednesday May 13. Please let me know if you have any questions or would like to sit down to discuss this further. Please do let me know if there are any factual errors or misunderstandings therein regarding work completed or work yet to be completed. As always, we will seek future conversations on issues as identified that may impact timing of implementation of the remedy.

By the way, in my opinion the source control video is very well done. I've placed a high definition copy in the administrative record and asked that Alanna consider posting to the existing website and certainly the new EPA ptld harbor website in progress.

Thank you.

S
